VOLUME 103 · NUMBER 5 · MAY 1994

---

- 731 ERIC A. ERTEL, MCHARDY M. SMITH, MARK D. LIEBOWITZ, and CHARLES J. COHEN. Isolation of myocardial L-type calcium channel gating currents with the spider toxin  $\omega$ -Aga-IIIa
- 755 THOMAS E. DECOURSEY and VLADIMIR V. CHERNY.  $\text{Na}^+/\text{H}^+$  antiport detected through hydrogen ion currents in rat alveolar epithelial cells and human neutrophils
- 787 BERND NILIUS, MASAHIRO OIKE, IVAN ZAHRADNIK, and GUY DROOGMANS. Activation of a  $\text{Cl}^-$  current by hypotonic volume increase in human endothelial cells
- 807 NITZA ILAN, AMNON SCHWARTZ, and NAVA MORAN. External pH effects on the depolarization-activated K channels in guard cell protoplasts of *Vicia faba*
- 833 S. NAKAYAMA, H. NOMURA, and T. TOMITA. Intracellular-free magnesium in the smooth muscle of guinea pig taenia caeci: a concomitant analysis for magnesium and pH upon sodium removal
- 853 QIANG TU, PATRICIO VELEZ, MARCIA CORTES-GUTIERREZ, and MICHAEL FILL. Surface charge potentiates conduction through the cardiac ryanodine receptor channel
- 869 ANJALI SAGAR and R. F. RAKOWSKI. Access channel model for the voltage dependence of the forward-running  $\text{Na}^+/\text{K}^+$  pump
- 895 MARC A. POST and DAVID C. DAWSON. Basolateral  $\text{Na}^+/\text{H}^+$  antiporter. Mechanisms of electroneutral and conductive ion transport
- 917 BRUNS A. WATTS, III and DAVID W. GOOD. Effects of ammonium on intracellular pH in rat medullary thick ascending limb: mechanisms of apical membrane  $\text{NH}_4^+$  transport
