

CONTENTS · THE JOURNAL OF  
General Physiology

---

VOLUME 74 · NUMBER 4 · OCTOBER 1979

---

- 429 M. R. BENNETT and N. A. LAVIDIS. The effect of calcium ions on the secretion of quanta evoked by an impulse at nerve terminal release sites
- 457 CHRISTOPHER MILLER and ROBERT L. ROSENBERG. Modification of a voltage-gated  $K^+$  channel from sarcoplasmic reticulum by a pronase-derived specific endopeptidase
- 479 STEFAN BIEDERT, WILLIAM H. BARRY, and THOMAS W. SMITH. Inotropic effects and changes in sodium and calcium contents associated with inhibition of monovalent cation active transport by ouabain in cultured myocardial cells
- 495 GLYNN WILSON with the technical assistance of MICHAEL EIDELBERG and VICTOR MICHALAK. Selective hepatic uptake of synthetic glycoproteins. Mannosaminated ribonuclease A dimer and serum albumin
- 511 ROBERT D. PRUSCH and JO ANN HANNAFIN. Calcium distribution in *Amoeba proteus*
- 523 ROBERT D. PRUSCH and JO ANN HANNAFIN. Sucrose uptake by pinocytosis in *Amoeba proteus* and the influence of external calcium
- 537 M. ZAMIR, J. A. MEDEIROS, and T. K. CUNNINGHAM. Arterial bifurcations in the human retina
