

CONTENTS · THE JOURNAL OF
General Physiology

VOLUME 75 · NUMBER 2 · FEBRUARY 1980

- 109 GUY SALAMA, ROBERT G. JOHNSON, and ANTONIO SCARPA. Spectrophotometric measurements of transmembrane potential and pH gradients in chromaffin granules
- 141 CHESTER J. KARWOSKI and LUIS M. PROENZA. Neurons, potassium, and glia in proximal retina of *Necturus*
- 163 C. R. SCHEID and F. S. FAY. Control of ion distribution in isolated smooth muscle cells. I. Potassium
- 183 MARK T. NELSON and MORDECAI P. BLAUSTEIN with the technical assistance of E. M. SANTIAGO. Properties of sodium pumps in internally perfused barnacle muscle fibers
- 207 HENRY A. LESTER, MAURI E. KROUSE, MENASCHE M. NASS, NORBERT H. WASSERMANN, and BERNARD F. ERLANGER. A covalently bound photoisomerizable agonist. Comparison with reversibly bound agonists at *Electrophorus* electroplaques
- 233 LETTERS TO THE EDITOR
- CHARLES EDWARDS. What is the source of the calcium that activates contraction of barnacle muscles under physiological conditions?
- C. CAPUTO and R. DiPOLO. Reply to Edward's letter: does external calcium play any role in contractile activation?
