

CONTENTS · THE JOURNAL OF
General Physiology

VOLUME 75 · NUMBER 5 · MAY 1980

- 469 TERRY M. DWYER, DAVID J. ADAMS, and BERTIL HILLE. The permeability of the endplate channel to organic cations in frog muscle
- 493 DAVID J. ADAMS, TERRY M. DWYER, and BERTIL HILLE. The permeability of endplate channels to monovalent and divalent metal cations
- 511 JEROME F. FIEKERS, PAUL M. SPANNBAUER, BERTHANN SCUBON-MULIERI, and RODNEY L. PARSONS. Voltage dependence of desensitization. Influence of calcium and activation kinetics
- 531 J. A. M. HINKE. Water and electrolyte content of the myofilament phase in the chemically skinned barnacle fiber.
- 533 T. ANAGNOSTOPOULOS, J. TEULON, and A. EDELMAN. Conductive properties of the proximal tubule in *Necturus* kidney
- 589 KEN TAKEDA, PETER H. BARRY, and PETER W. GAGE. Effects of ammonium ions on endplate channels
