

CONTENTS · THE JOURNAL OF
General Physiology

VOLUME 76 · NUMBER 3 · SEPTEMBER 1980

- 253 ETE Z. SZUTS. Calcium flux across disk membranes. Studies with intact rod photoreceptors and purified disks
- 287 BRUCE K. KRUEGER and MORDECAI P. BLAUSTEIN with the technical assistance of RONALD W. RATZLAFF. Sodium channels in presynaptic nerve terminals. Regulation by neurotoxins
- 315 G. E. KIRSCH, J. Z. YEH, J. M. FARLEY, and T. NARAHASHI. Interaction of *n*-alkylguanidines with the sodium channels of squid axon membrane
- 337 ISAO INOUE. Separation of the action potential into a Na-channel spike and a K-channel spike by tetrodotoxin and by tetraethylammonium ion in squid giant axons internally perfused with dilute Na-salt solutions
- 355 CHAU H. WU, PAUL J. SIDES, and TOSHIO NARAHASHI. Interaction of deoxycholate with the sodium channel of squid axon membranes
- 381 LOREN H. COHEN and PHILIP R. STEINMETZ. Control of active proton transport in turtle urinary bladder by cell pH

(3) 253-396 (1980)
