VOLUME 76 · NUMBER 4 · OCTOBER 1980

---

- 397 PEDRO LABARCA, ROBERTO CORONADO, and CHRISTOPHER MILLER. Thermodynamic and kinetic studies of the gating behavior of a  $K^+$ -selective channel from the sarcoplasmic reticulum membrane
- 425 ROBERTO CORONADO, ROBERT L. ROSENBERG, and CHRISTOPHER MILLER. Ionic selectivity, saturation, and block in a  $K^+$ -selective channel from sarcoplasmic reticulum
- 447 RICHARD S. FISHER, DAVID ERLIJ, and SANDY I. HELMAN. Intracellular voltage of isolated epithelia of frog skin. Apical and basolateral cell punctures
- 455 L. C. STONER and F. M. KREGENOW. A single-cell technique for the measurement of membrane potential, membrane conductance, and the efflux of rapidly penetrating solutes in *Amphiuma* erythrocytes
- 479 C. J. KARWOSKI and L. M. PROENZA. Transient adaptation and sensitization in the retina of *Necturus*
- 499 HARUYASU FURUKAWA, JOHN P. BILEZIKIAN, and JOHN N. LOEB. Kinetics and thermodynamics of ouabain binding by intact turkey erythrocytes. Effects of external sodium ion, potassium ion, and temperature
