VOLUME 80 · NUMBER 4 · OCTOBER 1982

---

- 485 JOSEPH R. STIMERS and LOU BYERLY. Slowing of sodium current inactivation by ruthenium red in snail neurons
- 499 ROBERT E. SHERIDAN and HENRY A. LESTER. Functional stoichiometry at the nicotinic receptor. The photon cross section for phase 1 corresponds to two Bis-Q molecules per channel
- 517 MICHAEL L. WOODRUFF, GORDON L. FAIN, and BRUCE L. BASTIAN. Light-dependent ion influx into toad photoreceptors
- 537 MICHAEL L. WOODRUFF and GORDON L. FAIN.  $\text{Ca}^{2+}$ -dependent changes in cyclic GMP levels are not correlated with opening and closing of the light-dependent permeability of toad photoreceptors
- 557 A. S. VERKMAN and A. K. SOLOMON. A stepwise mechanism for the permeation of phloretin through a lipid bilayer
- 583 J. E. ZENGEL and K. L. MAGLEBY. Augmentation and facilitation of transmitter release. A quantitative description at the frog neuromuscular junction
- 613 K. L. MAGLEBY and J. E. ZENGEL. A quantitative description of stimulation-induced changes in transmitter release at the frog neuromuscular junction
