

CONTENTS · THE JOURNAL OF
General Physiology

VOLUME 85 · NUMBER 3 · MARCH 1985

- 325 WALTER F. BORON. Intracellular pH-regulating mechanism of the squid axon. Relation between the external Na^+ and HCO_3^- dependences
- 347 T. L. MULLEN, M. MULLER, and J. T. VAN BRUGGEN. Role of solute drag in intestinal transport
- 365 HITOSHI KOMURO, AKIHIKO HIROTA, TOSHIHIKO YADA, TETSURO SAKAI, SHIROH FUJII, and KOHTARO KAMINO. Effects of calcium on electrical propagation in early embryonic precontractile heart as revealed by multiple-site optical recording of action potentials
- 383 B. A. CURTIS and R. S. EISENBERG. Calcium influx in contracting and paralyzed frog twitch muscle fibers
- 409 LUIS REUSS and KARL-UWE PETERSEN. Cyclic AMP inhibits Na^+/H^+ exchange at the apical membrane of *Necturus* gallbladder epithelium
- 431 SETSUKO NAGAHAMA and KENZO KURIHARA. Norepinephrine as a possible transmitter involved in synaptic transmission in frog taste organs and Ca dependence of its release
- 443 LOUIS SIMCHOWITZ and ALBERT ROOS. Regulation of intracellular pH in human neutrophils
- 471 LETTERS TO THE EDITOR
- PAUL H. AXELSEN and JOHN H. B. BRIDGE. Electrochemical ion gradients and the Na/Ca exchange stoichiometry. Measurements of these gradients are thermodynamically consistent with a stoichiometric coefficient ≥ 3
- SHEY-SHING SHEU and HARRY A. FOZZARD. Na/Ca exchange in the intact cardiac cell
