

CONTENTS · THE JOURNAL OF
General Physiology

VOLUME 90 · NUMBER 2 · AUGUST 1987

- 173 LUIS REUSS. Cyclic AMP inhibits $\text{Cl}^-/\text{HCO}_3^-$ exchange at the apical membrane of *Necturus* gallbladder epithelium
- 197 R. MOTAIS, F. GARCIA-ROMEU, and F. BORGES. The control of Na^+/H^+ exchange by molecular oxygen in trout erythrocytes. A possible role of hemoglobin as a transducer
- 209 JOSEPH S. ADORANTE and PETER M. CALA. Activation of electroneutral K flux in *Amphiuma* red blood cells by *N*-ethylmaleimide. Distinction between K/H exchange and KCl cotransport
- 229 MASANORI SAKURANAGA, YU-ICHIRO ANDO, and KEN-ICHI NAKA. Dynamics of the ganglion cell response in the catfish and frog retinas
- 261 P. KAY WAGONER and GERRY S. OXFORD. Cation permeation through the voltage-dependent potassium channel in the squid axon. Characteristics and mechanisms
- 291 JOHN R. SACHS. Inhibition of the Na,K pump by vanadate in high-Na solutions. Modification of the reaction mechanism by external Na acting at a high-affinity site
